Internet Information Services

Overview

The Distributed Edition of XLReporter requires Internet Information Services (IIS) to be installed and for a specified set of features to be enabled. Installation will attempt to install IIS and enable the features required.

If there are any issues with this during installation or if you would like to do the IIS installation and feature enablement manually, the following guides you through what you need to do based on the Operating System.

Windows 10/ Windows 11

To install, open the **Windows Control Panel** and select **Programs and Features**.

Select **Turn Windows Features on or off** to display a list of Windows Features. Check **Internet Information Services**.

Expand **Internet Information Services** then **Web Management Tools**. Make sure the following items are checked:

- IIS Management Console

Expand **Internet Information Services**, **World Wide Web Services**.

Expand **Application Development Features** and make sure the following items are checked:

- ASP.NET (4.x)
- .NET Extensibility (4.x)
- ISAPI Extensions
- ISAPI Filters

Expand **Common HTTP Features** and make sure the following items are checked:

- Default Document
- Directory Browsing
- HTTP Errors
- Static Content

Expand **Health and Diagnostics** and make sure the following items are checked:

- HTTP Logging
- Request Monitor

Expand **Performance Features** and make sure the following items are checked:

- Static Content Compression

Expand **Security** and make sure the following items are checked:

- Request Filtering

Click **OK**.

Windows Server 2016 and above

To install, open the **Windows Control Panel** and select **Programs and Features**.

Select **Turn Windows Features on or off** to display **Server Manager**. Select **Add Roles, Server Roles**, then check **Web Server (IIS)**. Add the feature. Under **Web Server Role (IIS)** select **Role Services**.

Expand **Web Server**, **Common HTTP Features** and make sure the following items are checked:

- Default Document
- Directory Browsing
- HTTP Errors
- Static Content

Expand **Health and Diagnostics** and make sure the following items are checked:

- HTTP Logging
- Request Monitor

Expand **Performance** and make sure the following items are checked:

- Static Content Compression

Expand **Security** and make sure the following items are checked:

- Request Filtering

Expand **Application Development** and make sure the following items are checked:

- ASP.NET (4.x)
- .NET Extensibility (4.x)
- ISAPI Extensions
- ISAPI Filters
