

Themes

Overview

Themes are used to maintain a consistent report appearance. They are defined in the **Theme** builder, opened from the **Design** tab of the **Template Studio**.

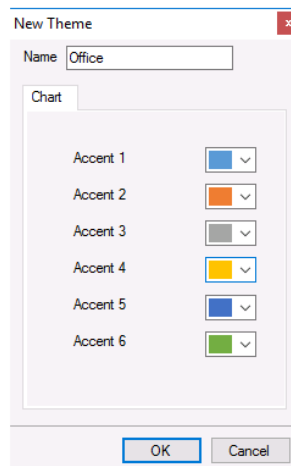

Theme Builder

Open an existing template in the **Template Studio**. From the **Design** tab select **Themes**.

The **Active** column dictates which of the current themes is actively being used. Only one theme can be active in a project.

To add a new theme click **Add** or to modify a selected theme click **Modify**. The edit window displays a tab to setup **Chart** themes.

This defines the themes for charts that are added to the template using the **Chart Design** option of the **Studio**. When a new chart is added to a template, the series colors adhere to the **Accent** colors of the theme.
